

Zain Ul Aabaidin

CLOUD ENGINEER

Islamabad, Pakistan +92 348 4349905 zainulaabaidin@gmail.com
[linkedin.com/in/zainulaabaidin](https://www.linkedin.com/in/zainulaabaidin) github.com/zainulaabaidin

As a Cloud Engineer, I design and implement scalable, secure, and cost-effective solutions across Azure, AWS, and Huawei Cloud. Skilled in infrastructure, networking, storage, and security, I focus on performance optimization and cloud best practices to deliver innovative and reliable solutions.

EDUCATION

MS, Artificial Intelligence — Air University, E-9 Campus, Islamabad Sep 2025 – Present

BS, Computer Science — Virtual University of Pakistan, Islamabad 2024

PROJECTS

Brain Tumor Segmentation with YOLO 11 and SAM2 Apr 2025 – May 2025

github.com/Zaynulaabaidin/Brain-Tumor-Segmentation-with-YOLO-11-and-SAM2

Developed a brain tumor segmentation model leveraging YOLOv11 for object detection and SAM2 for precise mask generation, enhancing segmentation accuracy across diverse MRI datasets; applied fine-tuning and integration of state-of-the-art architectures to improve localization and boundary delineation.

Diabetes Prediction Using Classification Method Oct 2023 – May 2024

github.com/Zaynulaabaidin/Diabetes-Prediction-Using-Classification-Method

Developed a diabetes prediction model using classification algorithms, achieving 70% accuracy in predicting diabetes from patient datasets; refined the algorithm to identify key predictors within patient data, yielding measurable accuracy improvements.

Power Gym Aug 2019 – Dec 2019

github.com/Zaynulaabaidin/PowerGym-Website

Built a responsive, accessible website using Bootstrap, HTML, CSS, and JavaScript, ensuring cross-device compatibility with a user-centric design; improved the responsiveness and efficiency of interactive elements, reducing page load times by 20%.

CERTIFICATIONS

Huawei Cloud Architecture Solution

August 2025

Cloud infrastructure design, core Huawei Cloud services, scalability, security, and cost optimization.

Azure Fundamentals

November 2024

Cloud concepts, core Azure services, and cloud security.

WordPress

May 2021

Creating and customizing websites using themes, plugins, and custom coding.

Diploma in Information Technology

December 2020

IT fundamentals: troubleshooting, system administration, and implementing IT solutions.
